On-the-ground in Desert Storm, 3 tours in Afghanistan, multiple deployments across Middle East and North Africa

Military Liaison to Afghanistan President Hamid Karzai

Afghanistan Peace and Reconciliation Program

Authored Navy Counter-Terrorism Optimization Report

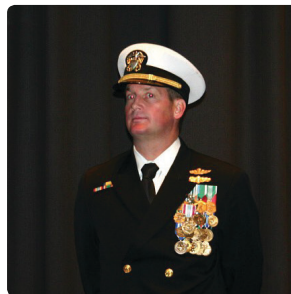

EXECUTIVE RISK SEMINAR

Social Risk: An Increasing Threat

Social risk is the result of unresolved economic, ethnic, and political grievances compounded by 21st century communications technologies. Its frequency and magnitude are increasing and manifest daily through protests strikes, litigation, and violence. It accentuates many traditional risk factors (e.g. reputational, technical, environmental, legal) and directly impacts operational and investment decisions.

ENODO's President, Mr. James Sisco discusses how companies can pinpoint, forecast, and mitigate the impacts of Social Risk, through real-world experiences and contemporary case studies.

ENODO's Executive Social Risk Seminar:

- Introduces a new, proactive approach to risk analysis and mitigation
- Enables business leaders and managers to understand the drivers, dynamics, and impact of social risk on an organization's risk portfolio
- Provides a competitive advantage to (1) identify mispriced investment opportunities, (2) mitigate to increase risk-adjusted returns, and (3) forecast to avoid extreme downside losses previously labeled black/gray swan events
